STAR SPAIN RECORDS STRONG GROWTH

2001 was a very successful year for STAR Servicios Lingüísticos, S.L. in Spain. With a growth rate of over 50% compared to the year 2000, STAR's Spanish subsidiary is continuing its unabated spate of two-digit expansion. "We reckon that turnover this year will be about 25% up on last year's figures," so says CEO Michael Scholand. "We can safely claim that we are now a Multilingual Language Provider on the Spanish market. For one of our key accounts, we deliver turnkey multilingual documentation solutions in 26 different languages for such diverse markets as Saudi Arabia, Hong Kong, Israel, Bulgaria and Finland," continues Scholand. "We have also expanded on the language technology side with large orders of STAR software for companies such as Telefónica, the World Tourism Organization and Berlitz Global Net." Expansion also means an increase in the number of employees. "Knowledge is our capital and training our added value." With this statement, Michael Scholand sums up the company's motivation for their intensive training activities geared to language professionals. Scholand adds, "We not only offer CAT training but also courses for translators in the automotive, engineering, telecomms and IT fields." Recently, the Spanish translation agency moved to larger offices in the Catalonian capital of Barcelona.
