

Consistency across the board, in all **languages**, corporate wording **worldwide**, extensive **functionality** in an open **system architecture**. Terminology Management powered by **TermStar^{NXT}**

TermStar^{NXT} – Communicate Effectively with Corporate Wording

Terminology is an important component of technical documentation and communication. Reliable, understandable, and user-appropriate product information requires specific and – above all – consistent use of terminology.

Corporate Wording – made easy

TermStar^{NXT} is the professional solution for creating, managing, and maintaining corporate terminology. Centralized, single-source data management, open system architecture, structured data storage, and an extremely user-friendly interface provide the ideal framework for successful terminology management.

Corporate Wording – on target

The sophisticated technology of TermStar^{NXT} allows searches to be conducted simultaneously in decentralized, local dictionaries and databases and centrally maintained terminology resources via WebTerm, STAR's web-based terminology management solution. The ability to prioritize dictionaries (by document type and subject), attribution at the entry level (subject matter, source, multimedia, etc.), and comprehensive, powerful search and filter functions help to find just the right term.

Corporate Wording – context on-the-fly

No need for in-context examples in the dictionary – TermStar^{NXT} gives users the context of each terminology entry on-the-fly. The corresponding text passages from the Transit^{NXT} translation memory are available at a click of the mouse.

Corporate Wording – user profiles, made to order

With TermStar^{NXT}, corporate terminology is always provided in just the right format – whether as a standalone solution for terminologists or an essential component in the translation process (Transit^{NXT}), for corporate validation processes via the intranet or Internet (WebTerm) or workflow integration (Corporate Language Management). And last but not least, TermStar^{NXT} supports data exchange with other systems.

Your advantages at a glance

- ▲ Shorter time-to-market for global product communication
- ▲ Cost-savings through consistency
- ▲ Comprehensive terminology-compilation and management functionality
- ▲ Versatile display options (by user or project)
- ▲ Higher-quality matches via Dynamic Linking (with Transit TM)
- ▲ Unicode support (over 180 languages), for multilingual and multidirectional use
- ▲ Integrated Web search
- ▲ Multimedia integration
- ▲ Convenient search functions and filter options (fuzzy search, wildcard search, complex filters)
- ▲ Efficient work environment
- ▲ Simultaneous use of terminology resources ranked by priority
- ▲ Quality-assurance functions
- ▲ Project management at a glance with TermStar^{NXT} Project Browser
- ▲ Online teamwork using different work models
- ▲ Integration into workflow and machine translation
- ▲ Extensive statistics functions
- ▲ Support of exchange formats such as TMX/TBX/MARTIF/CSV/Excel
